THIS BRITISH STANDARD, having been approved by the Iron and Steel Industry Standards Committee and endorsed by the Chairman of the Engineering Divisional Council, was published under the authority of the General Council on 6th May, 1964.

First published April, 1945.
First revision May, 1964.

The Institution desires to call attention to the fact that this British Standard does not purport to include all the necessary provisions of a contract.

In order to keep abreast of progress in the industries concerned, British Standards are subject to periodical review. Suggestions for improvements will be recorded and in due course brought to the notice of the committees charged with the revision of the standards to which they refer.

A complete list of British Standards, numbering over 4000, indexed and cross-indexed for reference, together with an abstract of each standard, will be found in the Institution's Yearbook, price 15s.

This standard makes reference to the following British Standards:

B.S. 18. Tensile testing of metals.

B.S. 785. Hot rolled bars and hard drawn steel wire for the reinforcement of concrete. Part 2. Hard drawn mild steel wire.

B.S. 1144. Cold worked deformed steel bars for the reinforcement of concrete.

B.S. 1449. Steel plate, sheet and strip.

British Standards are revised, when necessary, by the issue either of amendment slips or of revised editions. It is important that users of British Standards should ascertain that they are in possession of the latest amendments or editions.

The following B.S.I. references relate to the work on this standard:
Committee reference ISE/9, ISE/9/-/4.
Draft for comment D62/5495.

Foreword	6

SPECIFICATION

PART 1. WELDED HARD DRAWN STEEL WIRE FABRIC, COLD TWISTED SQUARE BAR FABRIC AND OTHER COLD WORKED DEFORMED BAR FABRIC

1. Scope	6
2. Definitions	6
3. Designation of fabric for ordering purposes	7
4. Quality of steel	7
5. Condition of finished fabric	7
6. Process of manufacture	7
7. Dimensions and weights	7
8. Derivation of weight	7
9. Tolerance on size of mesh	8
10. Tolerance on size of sheet	8
11. Tolerance on weight of fabric	8
12. Inspection and testing	8
13. Selection of the Manufacturer's test samples	8
14. Tensile and bend tests	9
15. Purchaser's tests	9
16. Identification	9
17. Defects revealed after delivery	9

TABLES

1. Dimensions and properties of welded hard drawn steel wire fabric	10
1M. Metric equivalents of Table 1 (Appendix B)	19
2. Dimensions and properties of interwoven cold twisted square bar fabric	11
2M. Metric equivalents of Table 2 (Appendix B)	20
4. Dimensions and properties of welded steel fabric manufactured from square twisted and other cold worked deformed bars to B.S. 1144	12
4M. Metric equivalents of Table 4 (Appendix B)	21

PART 2. EXPANDED METAL (STEEL) FABRIC

	Page
18. Scope	13
19. Definition	13
20. Designation of fabric for ordering purposes	13
21. Quality of steel	13
22. Condition of finished fabric	13
23. Process of manufacture	13
24. Dimensions and weights	13
25. Derivation of weight	14
26. Tolerance on size of mesh	14
27. Tolerance on size of sheet	14
28. Tolerance on weight of sheet	14
29. Inspection and testing	14
30. Selection of the manufacturer's test samples	14
31. Tensile and bend tests	15
32. Purchaser's tests	15
33. Identification	15
34. Defects revealed after delivery	16

TABLES

3. Dimensions and properties of expanded metal (steel) fabric	17
3M. Metric equivalents of Table 3 (Appendix B)	22

APPENDICES

A. Expanded metal, dimensioning and test sample	18
B. Metric equivalents of tables in the specification	19

CO-OPERATING ORGANIZATIONS

The Iron and Steel Industry Standards Committee, under whose supervision this British Standard was prepared, consists of representatives from the following Government departments and scientific and industrial organizations:

Admiralty
Alloy Steels Association
British Bolt, Nut, Screw and Rivet Federation
British Cast Iron Research Association
British Constructional Steelwork Association
British Electrical and Allied Manufacturers' Association
*British Iron and Steel Federation
British Ironfounders' Association
British Mechanical Engineering Federation
British Railways Board
British Steel Castings Research Association
Council of Iron Producers
Council of Ironfoundry Associations
*Crown Agents for Oversea Governments and Administrations
Engineering Equipment Users' Association
*Federation of Civil Engineering Contractors
Institute of British Foundrymen
*Institute of Iron and Steel Wire Manufacturers
Institute of Marine Engineers
*Institution of Civil Engineers
Institution of Mechanical Engineers (Automobile Division
*Institution of Structural Engineers
Iron and Steel Board
Iron and Steel Institute
Joint Iron Council
Lloyd's Register of Shipping
Ministry of Aviation
Ministry of Labour (H.M. Factory Inspectorate)
*Ministry of Transport
National Association of Drop Forgers and Stampers
National Ironfounding Employers' Federation
National Physical Laboratory (D.S.I.R.)
Oil Companies Materials Association
Royal Institute of British Architects
Shipbuilding Employers' Federation
Society of British Aircraft Constructors
Society of Motor Manufacturers and Traders Ltd.
War Office

The Government departments and scientific and industrial organizations marked with an asterisk in the above list, together with the following, were directly represented on the committee entrusted with the preparation of this British Standard:

Cement and Concrete Association
D.S.I.R.—Building Research Station
Federation of Associations of Specialists and Sub-Contractors
Institution of Municipal Engineers
London County Council
Ministry of Public Building and Works
National Federation of Building Trades Employers
Reinforced Concrete Association
Reinforcement Manufacturers Association
Reinforcement Steel Engineers' Association
