RT/E/S/40033	Feb 96	1	NRCS	Core Maintenance Specification for Overhead Cranes
RT/E/S/40035	Oct 00	2	NRCS	Core Maintenance Specification for Storage & Dispensing systems
RT/E/S/40036	Feb 96	1	NRCS	Core Maintenance Specification for Car Park Equipment

Detailed description of the changes

These specifications apply to stations and light maintenance depots, which are subject to franchised tenancy agreements. It has not been possible to manage the compliance requirements of these standards in accordance with RT/LS/P/045 due to the nature of these agreements.

To counteract the withdrawal of these specifications, a non-mandatory Code of Practice will be published to meet Network Rail's obligations to its tenants and their employees. Any non-compliances will be identified and managed in accordance with the terms of these lease agreements.

This manual will cover the equivalent subject matter in terms of best practice and will also be issued free of charge to all affected tenants when the listed standards are withdrawn.

There will be no adverse impacts imported by withdrawing these documents.

Implementation

The provisions of this document shall be applied from 5th February 2005
