THIS BRITISH STANDARD, having been approved by the Electrical Industry Standards Committee and endorsed by the Chairman of the Engineering Divisional Council, was published under the authority of the General Council on 28th December, 1956.

First published, October, 1925
First revision, January, 1930
Second revision, March, 1934
Third revision, December, 1956

The Institution desires to call attention to the fact that this British Standard does not purport to include all the necessary provisions of a contract.

In order to keep abreast of progress in the industries concerned, British Standards are subject to periodical review. Suggestions for improvements will be recorded and in due course brought to the notice of the committees charged with the revision of the standards to which they refer.

A complete list of British Standards, numbering over 2500, indexed and cross-indexed for reference, together with an abstract of each standard, will be found in the Institution's Yearbook, price 12s. 6d.

This standard makes reference to the following British Standards :

B.S. 18. Tensile testing of metals
B.S. 84. Screw threads of Whitworth form
B.S. 205. Glossary of terms used in electrical engineering
B.S. 2627. Wrought aluminium for electrical purposes. Wire.
B.S. 2763. Steel wire for ropes

See Note 1. Page 6.

British Standards are revised, when necessary, by the issue either of amendment slips or of revised editions. It is important that users of British Standards should ascertain that they are in possession of the latest amendments or editions.

The following B.S.I. references relate to the work on this standard :—
Committee reference ELE/17/1 Draft for comment CR(ELE) 2861

CONTENTS

	Page
Co-operating organizations	5
Foreword	6
SPECIFICATION	
SECTION ONE : GENERAL	
1. Scope	7
2. Definitions	7
3. Standards for hard-drawn aluminium	8
4. Standards for galvanized steel wire	8
SECTION TWO : MATERIAL	
5. Material	8
6. Freedom from defects	8
SECTION THREE : DIMENSIONS AND CONSTRUCTION	
7. Standard sizes of solid wires	9
8. Tolerances on the standard diameter of wires	9
9. Standard sizes of steel-cored aluminium conductors	9
10. Joints in wires and conductors	9
11. Stranding	9
SECTION FOUR : TESTS	
12. Selection of test samples	10
13. Place of testing	11
14. Mechanical tests	11
15. Galvanizing test	12
16. Resistivity test	12
17. Certificate of compliance	12

TABLES

	Page
1. Lay ratios for steel-cored aluminium conductors	10
2. Multiplier constants for aluminium	13
3. Aluminium wires used in the construction of standard steel-cored aluminium conductors	14
4. Steel wires used in the construction of standard steel-cored aluminium conductors	15
5. Standard steel-cored aluminium conductors	16
6. Increase in length due to stranding	17
7. Stranding constants	18
8. Modulus of elasticity and coefficient of linear expansion	19

APPENDICES

A. Notes on the calculation of Table 5	17
B. Notes on modulus of elasticity and coefficient of linear expansion	19
C. Code names for steel-cored aluminium conductors	20

CO-OPERATING ORGANIZATIONS

The Electrical Industry Standards Committee under whose supervision this British Standard was prepared, consists of representatives from the following Government departments and scientific and industrial organizations :

Admiralty
Air Ministry
Associated Offices' Technical Committee
*Association of Consulting Engineers (Incorporated)
Association of Supervising Electrical Engineers
*British Electrical and Allied Industries Research Association
*British Electrical and Allied Manufacturers' Association
British Electrical Development Association
*British Railways, The British Transport Commission
*Cable Makers' Association
*Central Electricity Authority and Area Boards
*Crown Agents for Oversea Governments and Administrations
Electric Lamp Manufacturers' Association
Electric Light Fittings Association
Electrical Contractors' Association (Incorporated)
Electrical Contractors' Association of Scotland
Engineering Equipment Users' Association
*General Post Office
Independent Cable Makers' Association
*Institution of Electrical Engineers
*Ministry of Fuel and Power
Ministry of Labour and National Service (Factory Department)
Ministry of Supply
Ministry of Works
*National Physical Laboratory (D.S.I.R.)
*North of Scotland Hydro Electric Board
Oil Companies Materials Committee
Public Transport Association (Incorporated)
Radio Industry Council
*South of Scotland Electricity Board
*War Office

The Government departments and scientific and industrial organizations marked with an asterisk in the above list, together with the following, were directly represented on the Committee entrusted with the preparation of the standard.

Aluminium Development Association
Aluminium Industry Council
Copper Development Association
High Commission of India
High Conductivity Copper Association
Institute of Iron and Steel Wire Manufacturers
