National foreword

This British Standard has been prepared under the direction of the Elements and Components (of Diverse Materials) for Buildings Standards Policy Committee. It is the English language version of EN 27390:1990 "*Building construction — Jointing products — Determination of resistance to flow*" published by the European Committee for Standardization (CEN) and supersedes clause **8** of BS 3712-1:1985. A new edition of BS 3712-1 has been published, excluding clause **8** of the 1985 edition which is withdrawn. EN 27390:1990 is identical with ISO 7390:1987 published by the International Organization for Standardization (ISO).

The standard was developed by Sub-committee ISO/TC 59/SC 8, Jointing Products, of Technical Committee ISO/TC 59, Building Construction.

National appendices are designated "informative".

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
