National foreword

This British Standard has been prepared under the direction of the Technical Sector Board for Building and Civil Engineering and is the English language version of EN 320:1993 *Fibreboard — Determination of resistance to axial withdrawal of screws*, published by the European Committee for Standardization (CEN).

EN 320 was produced as a result of international discussion in which the UK took an active part.

The principle of the method is technically equivalent to **A.16** of BS 1142:1989 *Specification for fibre building boards*, which will be withdrawn in due course.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
