National foreword

This Part of this British Standard has been prepared under the direction of the Clay Products Standards Committee and is the English language version of EN 188:1991 "*Ceramic tiles. Extruded ceramic tiles with a water absorption of E > 10 % (Group AIII)*" published by the European Committee for Standardization (CEN).

EN 188 was produced as a result of international discussion in which the UK took an active part.

Attention is drawn to the use in this standard of the comma as a decimal marker. This is to accord with European practice, but it should be noted that it is current practice in British Standards to use a full point on the baseline as a decimal marker.

Additional information. When marking or specifying a product (see **6.1** and **6.2**) the manufacturer may mark or specify by reference to either the European Standard or the British Standard.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
