Fluid Controls Institute

The Fluid Controls Institute is a non-profit trade association of manufacturers of fluid control and conditioning equipment. The FCI is dedicated to the technical advancement of the industry that it serves. The members of the institute have developed standards to help users/purchasers understand and specify correctly Fluid Controls Institute scope products. FCI standards are voluntary standards, and their existence does not in any respect preclude anyone, whether he has approved the standard or not, from manufacturing, marketing, purchasing or using products, processes, or procedures not conforming to the standards. Fluid Controls Institute standards are subject to periodic review and users are cautioned to obtain the latest editions.

CAUTION NOTICE:

This Fluid Controls Institute standard may be revised or withdrawn at any time. The procedures of the Fluid Controls Institute require that action be taken to reaffirm, revise, or withdraw this standard no later than five years from the date of publication. Purchasers of FCI standards may receive current information on all standards by calling or writing the Fluid Controls Institute.
