Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee B/541, Wood-based panels, upon which the following bodies were represented:

APA Engineered Wood Association
Association of British Plywood and Veneer Manufacturers
British Woodworking Federation
Council of the Forest Insdustries of British Columbia
Department of the Environment (Building Research Establishment)
Finnish Plywood International
Flat Roofing Contractors' Advisory Board
Forestry Commission
Furniture Industry Research Association
Institution of Structural Engineers
Local Authority Organizations
Mineral Bonded Board Products Federation
National Federation of Roofing Contractors
National House-Building Council
National Panel Products Association
Royal Institute of British Architects
Structural Board Association
Timber Research and Development Association
Timber Trade Federation
Wood Panel Industries Federation
Zurich Municipal Building Guarantee

This British Standard, having been prepared under the direction of the Sector Board for Building and Civil Engineering, was published under the authority of the Standards Board and comes into effect on 15 April 1997

National foreword

This British Standard has been prepared by Technical Committee B/541 and is the English language version of EN 312-6 : 1996 *Particleboards — Specifications — Part 6: Requirements for heavy duty load-bearing boards for use in dry conditions* published by the European Committee for Standardization (CEN). EN 312-6 was produced as a result of international discussions in which the United Kingdom took an active part.

BS EN 312-1, BS EN 312-2, BS EN 312-3, BS EN 312-4, BS EN 312-5, BS EN 312-6 and BS EN 312-7 together supersede BS 5669 : Part 2 : 1989 which will be withdrawn in accordance with CEN provisions within six months of completion of the full package of standards covering particleboards and related test methods. These standards are:

EN 120	EN 312-4	EN 322
EN 309	EN 312-5	EN 323
EN 310	EN 312-6	EN 324-1
EN 311	EN 312-7	EN 324-2
EN 312-1	EN 317	EN 325
EN 312-2	EN 319	EN 326-1
EN 312-3	EN 321	EN 1087-1

The values in table 1 of this standard are in most cases determined and expressed using different test methods and statistical procedures to those used to derive the values in tables 1 and 4 of BS 5669 : Part 2. Care should therefore be taken in drawing inferences on quality by a simple comparison of the numerical values in the two standards.

Particleboards conforming to the requirements of this standard may be referred to as P6 boards.
