National foreword

This British Standard is the UK implementation of ISO 22090-3:2014. It supersedes BS ISO 22090-3:2004 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee EPL/80, Maritime navigation and radiocommunication equipment and systems.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Foreword ... **iv**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **2**

4 Performance and requirements ... **3**
4.1 Functionality ... 3
4.2 Continuous operation ... 4
4.3 Presentation of information ... 4
4.4 Heading output alignment ... 4
4.5 Compensation for brief GNSS signal interruption ... 4
4.6 Settling time ... 4
4.7 Heading information ... 4
4.8 Alert signal ... 4
4.9 Interface ... 4

5 Accuracy ... **5**
5.1 General ... 5
5.2 Accuracy of transmission data ... 5
5.3 Static error (settle point error) ... 5
5.4 Dynamic error ... 5
5.5 Follow-up error ... 5

6 Type tests ... **5**
6.1 General ... 5
6.2 Organization of test conditions ... 5
6.3 Settling time test ... 6
6.4 Static error test ... 6
6.5 Dynamic test ... 6
6.6 Follow-up error test ... 7
6.7 Back-up test ... 7
6.8 Environmental test ... 7
6.9 Electromagnetic compatibility test ... 8
6.10 Interface test ... 8
6.11 Malfunction test ... 8

7 Marking and identification ... **8**

Annex A (informative) **Equivalent requirements in ISO 22090-3 and IMO Resolution MSC.116 (73)** ... **9**

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: Foreword - Supplementary information

The committee responsible for this document is ISO/TC 8, *Ships and marine technology*, Subcommittee SC 6, *Navigation and ship operations*.

This second edition cancels and replaces the first edition (ISO 22090-3:2004), of which has been technically revised. It also replaces ISO 22090-3:2004/Cor1:2005.

ISO 22090 consists of the following parts, under the general title *Ships and marine technology — Transmitting heading devices (THDs)*:

— *Part 1: Gyro-compasses*

— *Part 2: Geomagnetic principles*

— *Part 3: GNSS principles*
