Full document details: BS ISO 8856:2014

National foreword

This British Standard is the UK implementation of ISO 8856:2014.

The UK participation in its preparation was entrusted to Technical Committee AUE/16, Electrical and electronic equipment.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Foreword ..... **iv**

1 Scope **1**

2 Terms and definitions **1**

3 Test conditions **2**
3.1 Temperature 2
3.2 Measurement accuracy 2
3.3 Voltage/current characteristic of starter motor power supply 2
3.4 Preparation of test samples 3

4 Test benches **3**
4.1 General 3
4.2 Type 1 test bench 4
4.3 Type 2 test bench 4

5 Test method **6**
5.1 General 6
5.2 Test procedure 6

6 Measurement correction **7**
6.1 General 7
6.2 Correction of torque 7
6.3 Correction of rotational frequency with temperature 9

7 Presentation of results **10**
7.1 Power output and efficiency calculation 10
7.2 Graphic presentation of starter motor characteristic curves 10
7.3 Change of voltage/current characteristic 10

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: Foreword - Supplementary information

The committee responsible for this document is ISO/TC 22, *Road vehicles*, Subcommittee SC 3, *Electrical and electronic equipment*.

This third edition cancels and replaces the second edition (ISO 8856:1995), which has been technically revised. It also incorporates the Amendment ISO 8856:1995/Amd1:1997.
