PLEASE NOTE:

The information contained in this document was obtained from sources believed to be reliable and is based on technical information and experience currently available from members of the Compressed Gas Association, Inc. and others. However, the Association or its members, jointly or severally, make no guarantee of the results and assume no liability or responsibility in connection with the information or suggestions herein contained. Moreover, it should not be assumed that every acceptable commodity grade, test or safety procedure or method, precaution, equipment or device is contained within, or that abnormal or unusual circumstances may not warrant or suggest further requirements or additional procedure.

This document is subject to periodic review, and users are cautioned to obtain the latest edition. The Association invites comments and suggestions for consideration. In connection with such review, any such comments or suggestions will be fully reviewed by the Association after giving the party, upon request, a reasonable opportunity to be heard. Proposed changes may be submitted via the Internet at our web site, www.cganet.com.

This document should not be confused with federal, state, provincial, or municipal specifications or regulations; insurance requirements; or national safety codes. While the Association recommends reference to or use of this document by government agencies and others, this document is purely voluntary and not binding unless adopted by reference in regulations.

A listing of all publications, audiovisual programs, safety and technical bulletins, and safety posters is available via the Internet at our website at www.cganet.com. For more information contact CGA at Phone: 703-788-2700, ext. 799. E-mail: customerservice@cganet.com.

Work Item 19-030
Industrial Gases Apparatus Committee

NOTE—Technical changes from the previous edition are underlined.

Contents **Page**

1 Introduction 1

2 Scope 1

3 Definitions 1

4 Design considerations 2
4.1 General construction 2
4.2 Durability 3
4.3 Maximum operating pressures 3
4.4 Materials 3
4.5 Marking 3

5 Design qualification tests 3
5.1 Pressure tests 3
5.2 Pull test 4
5.3 Side load test 4
5.4 Cycle test 4
5.5 Resistance to fire and flashback test 4
5.6 Rated flow test 5

6 Production testing 5

7 Marking and identification 5

8 Safety requirements and recommendations 5

9 Maintenance/replacement requirements 6

10 References 6

Table

Table 1—Test pressures 3
