Foreword

NOTE: This foreword is introductory only and is not part of American National Standard FM 6020.

This standard is intended to verify that the product as described will meet minimum specific stated conditions of performance, safety and quality, useful in determining the potential suitability for end-use conditions of these products. It describes minimum performance requirements for products that are intended for use as intermediate bulk containers by evaluating the compatibility of the materials with various fluids and the performance of the materials in a fire exposure situation.

This American National Standard has been developed according to the essential requirements of due process for standards development of the American National Standards Institute (ANSI). FM Approvals is an ANSI-accredited standards developer (ASD).

Approval of an American National Standard requires verification by ANSI that the principles of openness and due process have been followed and that a consensus of those directly and materially affected by the standard has been achieved. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution. Consensus is established when, in the judgment of the ANSI Board of Standards Review, substantial agreement has been reached.

The American National Standards Institute does not develop standards nor will it in any circumstances give an interpretation of any American National Standard. Requests for interpretations of this test standard should be addressed to FM Approvals.

ANSI regulations require that this American National Standard shall be revised, reaffirmed or withdrawn within five years of the date of publication.

TABLE OF CONTENTS

1 INTRODUCTION 1
1.1 Purpose 1
1.2 Scope 1
1.3 Basis for Requirements 1
1.4 System of Units 1
2 APPLICABLE DOCUMENTS AND GLOSSARY 1
2.1 Applicable Documents 1
2.2 Glossary 2
3 GENERAL INFORMATION 2
3.1 Physical or Structural Features 2
3.2 Markings 2
3.3 Manufacturer's Installation and Operation Instructions 2
4 PERFORMANCE REQUIREMENT 3
4.1 Combustibility 3
APPENDIX A: UNITS OF MEASUREMENT 6
