International Standard 619

INTERNATIONAL ORGANIZATION FOR STANDARDIZATION•МЕЖДУНАРОДНАЯ ОРГАНИЗАЦИЯ ПО СТАНДАРТИЗАЦИИ•ORGANISATION INTERNATIONALE DE NORMALISATION

Manganese ores — Determination of chromium content — Diphenylcarbazide photometric method and silver persulphate titrimetric method

Minerais de manganèse — Dosage du chrome — Méthode photométrique à la diphénylcarbazide et méthode titrimétrique au persulfate d'argent

Second edition — 1981-12-15

UDC 669.74 : 543.24 : 546.76 **Ref. No. ISO 619-1981 (E)**

Descriptors : manganese ores, chemical analysis, determination of content, chromium, photometry, volumetric analysis.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 619 was developed by Technical Committee ISO/TC 65, *Manganese and chromium ores.*

This second edition was submitted directly to the ISO Council, in accordance with clause 5.10.1 of part 1 of the Directives for the technical work of ISO. It cancels and replaces the first edition (i.e. ISO 619-1975), which had been approved by the member bodies of the following countries:

Austria	Hungary	South Africa, Rep. of
Chile	India	Spain
Czechoslovakia	Italy	Switzerland
Egypt, Arab Rep. of	Korea, Rep. of	Turkey
France	Netherlands	United Kingdom
Germany, F.R.	Poland	USSR
Greece	Romania	Yugoslavia

No member body had expressed disapproval of the document.
