Summary

This document states the procedure for reporting and investigating pantograph uplift exceedances detected by trackside pantograph monitoring equipment operating on 25 kV overhead line electrification equipment managed by Railtrack.

Issue/Revision Record

This procedure will be updated when necessary by the distribution of a complete document. Amendments will be marked by vertical black line in the adjacent right hand margin.

Issue	Issue Date	Implementation Date	Comments
1	November 1997	4 April 1998	New Procedure

Implementation

The requirements of this procedure are mandatory and shall be enforced from the implementation date above unless express written permission is obtained for any deviation from the Director of Electrical Engineering & Control Systems.

Disclaimer

Railtrack PLC has used its best endeavours to ensure that the content, layout and text of this document is accurate, complete and suitable for its stated purpose. It makes no warranties, express or implied, that compliance with the contents of this document shall be sufficient to ensure safe systems of work or operation. Railtrack PLC will not be liable to pay compensation in respect of the content or subsequent use of this document for any purpose other than its stated purpose or for any purpose other than that for which it was prepared except where it can be shown to have acted in bad faith or there has been wilful default.

Supply

Persons requiring copies of this document shall obtain them from the Directorate's document control point. Copies of this procedure are distributed to the appropriate document control points.

Safety

All persons are reminded that all appropriate safety precautions must be observed when undertaking the work covered by this document.
