Date: 01 January 2021

Origin: International

Latest date for receipt of comments: 24 February 2021

Project No. 2020/02928

Responsible committee: CPL/61/7 Safety of electrical appliances - Heated appliance group

Interested committees:

Title: Draft BS EN IEC 60335-2-13 Household and similar electrical appliances - Safety. Part 2-13: Particular requirements for deep fat fryers, frying pans and similar appliances.

Please notify the secretary if you are aware of any keywords that might assist in classifying or identifying the standard or if the content of this standard

- i) has any issues related to 3rd party IPR, patent or copyright
- ii) affects other national standard(s)
- iii) requires additional national guidance or information

WARNING: THIS IS A DRAFT AND MUST NOT BE REGARDED OR USED AS A BRITISH STANDARD. THIS DRAFT IS NOT CURRENT BEYOND 24 February 2021

This draft is issued to allow comments from interested parties; all comments will be given consideration prior to publication. No acknowledgement will normally be sent. **See overleaf for information on the submission of comments.**

No copying is allowed, in any form, without prior written permission from BSI except as permitted under the Copyright, Designs and Patent Act 1988 or for circulation within a nominating organization for briefing purposes. Electronic circulation is limited to dissemination by e-mail within such an organization by committee members.

Further copies of this draft may be purchased from BSI Shop <http://shop.bsigroup.com> or from BSI Customer Services, Tel: +44(0) 20 8996 9001 or email cservices@bsigroup.com. British, International and foreign standards are also available from BSI Customer Services.

Information on the co-operating organizations represented on the committees referenced above may be obtained from <https://standardsdevelopment.bsigroup.com/>.

Introduction

This draft standard is based on national and international discussions. Your comments on this draft are invited and will assist in the preparation of the consequent standard.

For international standards, comments will be reviewed by the relevant UK national committee before sending the consensus UK vote and comments to the international committee, which will then decide appropriate action. If the international standard is approved, it is usual for the text to be published as a British Standard.

For national standards, comments will be reviewed by the relevant UK national committee and the resulting standards published as a British Standard.

UK Vote

Please indicate whether you consider the UK should submit a negative (with supporting technical reasons) or positive vote on this draft. Please indicate if you are aware of any reason why this draft standard should not be published as a British Standard.

Submission of Comments

- **Annotated drafts are not acceptable and will be rejected.**
- All comments should be submitted online at <https://standardsdevelopment.bsigroup.com/>. You will need to register in order to comment.

IEC TC 61 : SAFETY OF HOUSEHOLD AND SIMILAR ELECTRICAL APPLIANCES	
SECRETARIAT: United States of America	SECRETARY: Ms Randi Myers
OF INTEREST TO THE FOLLOWING COMMITTEES:	PROPOSED HORIZONTAL STANDARD: ☐ Other TC/SCs are requested to indicate their interest, if any, in this CDV to the secretary.
FUNCTIONS CONCERNED: ☐ EMC ☐ ENVIRONMENT ☐ QUALITY ASSURANCE ☒ SAFETY	
☐ SUBMITTED FOR CENELEC PARALLEL VOTING	☒ NOT SUBMITTED FOR CENELEC PARALLEL VOTING

This document is still under study and subject to change. It should not be used for reference purposes.

Recipients of this document are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

TITLE:

Household and similar electrical appliances - Safety - Part 2-13: Particular requirements for deep fat fryers, frying pans and similar appliances

PROPOSED STABILITY DATE: 2024

NOTE FROM TC/SC OFFICERS:

This document is circulated according to the decisions taken at the meeting of TC 61 in 2020/Web - see 61/5998A/DA.

History Refer to:

61/5956/DC and 61/6027A/INF in 61 (2020Web/Secretariat) 09 item 11.

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**HOUSEHOLD AND SIMILAR ELECTRICAL APPLIANCES –
SAFETY –****Part 2-13: Particular requirements for deep fat fryers,
frying pans and similar appliances****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

1 International Standard IEC 60335-2-13 has been prepared by IEC technical committee 61:
2 Safety of household and similar electrical appliances.

3 This seventh edition cancels and replaces the sixth edition published in 2009 and Amendment
4 1:2016. This edition constitutes a technical revision.

5 This edition includes the following significant technical changes with respect to the previous
6 edition:

7 – the text has been aligned with Part 1 Ed 6;

8 – some notes have been converted to normative text (1, 5.2, 5.101, 7.12, 15.101, 22.35,
9 24.1.5);

10 – an additional test has been introduced to limit the temperature rise of external accessible
11 surfaces (11).

12 The text of this International Standard is based on the following documents:

FDIS	Report on voting
61/XX/FDIS	61/XX/RVD

13 Full information on the voting for the approval of this International Standard can be found in the
14 report on voting indicated in the above table.

15 This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

16 This part 2 is to be used in conjunction with the latest edition of IEC 60335-1 and its
17 amendments. It was established on the basis of the sixth edition (2020) of that standard.

18 NOTE 1 When "Part 1" is mentioned in this standard, it refers to IEC 60335-1.

19 This part 2 supplements or modifies the corresponding clauses in IEC 60335-1, so as to convert
20 that publication into the IEC standard: Safety requirements for deep fat fryers, frying pans and
21 similar appliances.

22 When a particular subclause of Part 1 is not mentioned in this part 2, that subclause applies as
23 far as is reasonable. When this standard states "addition", "modification" or "replacement", the
24 relevant text in Part 1 is to be adapted accordingly.

25 NOTE 2 The following numbering system is used:

- 26 – subclauses, tables and figures that are numbered starting from 101 are additional to those in Part 1;
- 27 – unless notes are in a new subclause or involve notes in Part 1, they are numbered starting from 101, including
28 those in a replaced clause or subclause;
- 29 – additional annexes are lettered AA, BB, etc.

30 NOTE 3 The following print types are used:

- 31 – requirements: in roman type;
- 32 – *test specifications: in italic type;*
- 33 – notes: in small roman type.

34 Words in **bold** in the text are defined in Clause 3. When a definition concerns an adjective, the adjective and the
35 associated noun are also in bold.

36 The committee has decided that the contents of this document will remain unchanged until the
37 stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to
38 the specific document. At this date, the document will be

- 39 • reconfirmed,
- 40 • withdrawn,
- 41 • replaced by a revised edition, or
- 42 • amended.

43 The National Committees are requested to note that for this publication the stability date is
44 2024.

45 THIS TEXT IS INCLUDED FOR THE INFORMATION OF THE NATIONAL COMMITTEES AND
46 WILL BE DELETED AT THE PUBLICATION STAGE.

47 NOTE 4 The attention of National Committees is drawn to the fact that equipment manufacturers and testing
48 organizations may need a transitional period following publication of a new, amended or revised IEC publication in
49 which to make products in accordance with the new requirements and to equip themselves for conducting new or
50 revised tests.

51 It is the recommendation of the committee that the content of this publication be adopted for implementation nationally
52 not earlier than 12 months or later than 36 months from the date of publication.
