Subject 2360

July 28, 2017

SUMMARY OF TOPICS

The following is being proposed:

> ***1. Reaffirmation and Continuance of the First Edition of the Standard for Safety for Test Methods for Determining the Combustibility of Plastics Used in Semi-Conductor Tool Construction, UL 2360, as an American National Standard***

STP BALLOTS AND ALL COMMENTS DUE: September 11, 2017

UL's goal is to have no interest category comprise more than one-third of the STP membership balance. To improve the current balance for STP 2360, UL is looking for participants in all interest categories. Definitions for these interest categories are available on the Standards STP Internet site:

http://ulstandards.ul.com/develop-standards/participation/interest-categories/

If you are interested in applying for STP 2360 membership or are aware of potential candidates for this STP, please contact the STP Project Manager, Mary.Huras@ul.com.

1. Reaffirmation and Continuance of the First Edition of the Standard for Safety for Test Methods for Determining the Combustibility of Plastics Used in Semi-Conductor Tool Construction, UL 2360, as an American National Standard

RATIONALE

Proposal submitted by: Diane Haithcock, STP Chair

UL is proposing to reaffirm the ANSI approval of UL 2360. The status of ANSI approval is required to be updated by a positive, consensus reaffirmation of the standard by the STP if the standard has not been otherwise updated in the consensus process during the preceding five years.

UL is seeking only to maintain the currently published requirements in UL 2360 as an American National Standard. There are no new revisions being proposed at this time. A reaffirmation is a Yes / No vote provided by the STP on whether or not to reaffirm the standard "as is." Any specific comment on the standard or proposed change to the standard should be submitted as a new Proposal Request in CSDS for future consideration.

Please note that we have also issued a Call for Proposals. Do not hesitate to contact us if you have any questions regarding this request for proposals, how to submit proposals through UL's Collaborative Standards Development System (CSDS), or any aspect of UL's standards development process.

If you are not prepared to submit a proposal, but are aware of issues that you believe the STP should address, please contact the STP Chair, Diane Haithcock at (919) 549-1909 or via email at Diane.J.Haithcock@ul.com.
