Date: 01 February 2022

Origin: International

Latest date for receipt of comments: 16 March 2022

Project No. 2021/02157

Responsible committee: CPL/61/1 Motorised appliance group

Interested committees:

Title: Draft BS EN 60335-2-8 Ed.7.0 Household and similar electrical appliances - Safety. Part 2-8: Particular requirements for shavers, hair clippers and similar appliances.

Please notify the secretary if you are aware of any keywords that might assist in classifying or identifying the standard or if the content of this standard

- i) has any issues related to 3rd party IPR, patent or copyright
- ii) affects other national standard(s)
- iii) requires additional national guidance or information

WARNING: THIS IS A DRAFT AND MUST NOT BE REGARDED OR USED AS A BRITISH STANDARD. THIS DRAFT IS NOT CURRENT BEYOND 16 March 2022

This draft is issued to allow comments from interested parties; all comments will be given consideration prior to publication. No acknowledgement will normally be sent. **See overleaf for information on the submission of comments.**

No copying is allowed, in any form, without prior written permission from BSI except as permitted under the Copyright, Designs and Patent Act 1988 or for circulation within a nominating organization for briefing purposes. Electronic circulation is limited to dissemination by e-mail within such an organization by committee members.

Further copies of this draft may be purchased from BSI Shop <http://shop.bsigroup.com> or from BSI Customer Services, Tel: +44(0) 20 8996 9001 or email cservices@bsigroup.com. British, International and foreign standards are also available from BSI Customer Services.

Information on the co-operating organizations represented on the committees referenced above may be obtained from <https://standardsdevelopment.bsigroup.com/>.

Introduction

This draft standard is based on national and international discussions. Your comments on this draft are invited and will assist in the preparation of the consequent standard.

For international standards, comments will be reviewed by the relevant UK national committee before sending the consensus UK vote and comments to the international committee, which will then decide appropriate action. If the international standard is approved, it is usual for the text to be published as a British Standard.

For national standards, comments will be reviewed by the relevant UK national committee and the resulting standards published as a British Standard.

UK Vote

Please indicate whether you consider the UK should submit a negative (with supporting technical reasons) or positive vote on this draft. Please indicate if you are aware of any reason why this draft standard should not be published as a British Standard.

Submission of Comments

- **Annotated drafts are not acceptable and will be rejected.**
- All comments should be submitted online at <https://standardsdevelopment.bsigroup.com/>. You will need to register in order to comment.

Template for comments and secretariat observations

Date: xx/xx/20xx	Document: ISO/DIS xxxx
------------------	------------------------

1	2	(3)	4	5	(6)	7
MB	Clause No./ Subclause No./Annex (e.g. 3.1)	Paragraph/ Figure/Table/Note	Type of comment	Comment (justification for change) by the MB	Proposed change by the MB	Secretariat observations on each comment submitted
	3.1	Definition 1	ed	Definition is ambiguous and needs clarifying.	Amend to read '...so that the mains connector to which no connection...'	
	6.4	Paragraph 2	te	The use of the UV photometer as an alternative cannot be supported as serious problems have been encountered in its use in the UK.	Delete reference to UV photometer.

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**HOUSEHOLD AND SIMILAR ELECTRICAL APPLIANCES –
SAFETY –****Part 2-8: Particular requirements for shavers,
hair clippers and similar appliances****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 60335-2-8 has been prepared by IEC technical committee 61: Safety of household and similar electrical appliances. It is an International Standard.

This seventh edition cancels and replaces the sixth edition published in 2012, Amendment 1: 2015 and Amendment 2: 2018. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- alignment with IEC 60335-1: 2020;
- conversion of some notes to normative text (Clause 1, 3.1.9, 19.10, 20.1, 22.103)
- addition of requirements for detachable power supply parts (6.2, 21.102, 21.103, 24.2);
- clarification of applicability of 30.2.2 and 30.2.3 (30.2, 30.2.3);
- clarification of requirements for interconnection cords for Class III constructions

99 The text of this International Standard is based on the following documents:

FDIS	Report on voting
61/XX/FDIS	61/XX/RVD

100 Full information on the voting for the approval of this International Standard can be found in the
101 report on voting indicated in the above table.

102 The language used for the development of this International Standard is English.

103 This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in
104 accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available
105 at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are
106 described in greater detail at www.iec.ch/standardsdev/publications.

107 A list of all parts of the IEC 60335 series, under the general title: *Household and similar*
108 *electrical appliances – Safety*, can be found on the IEC website.

109 This part 2 is to be used in conjunction with the latest edition of IEC 60335-1 and its
110 amendments unless that edition precludes it; in that case, the latest edition that does not
111 preclude it is used. It was established on the basis of the sixth edition (2020) of that standard.

112 NOTE 1 When “Part 1” is mentioned in this standard, it refers to IEC 60335-1.

113 This part 2 supplements or modifies the corresponding clauses in IEC 60335-1, so as to convert
114 that publication into the IEC standard: Safety requirements for spin extractors.

115 When a particular subclause of Part 1 is not mentioned in this part 2, that subclause applies as
116 far as is reasonable. When this standard states “addition”, “modification” or “replacement”, the
117 relevant text in Part 1 is to be adapted accordingly.

118 NOTE 2 The following numbering system is used:

- 119 – subclauses, tables and figures that are numbered starting from 101 are additional to those in Part 1;
- 120 – unless notes are in a new subclause or involve notes in Part 1, they are numbered starting from 101, including
121 those in a replaced clause or subclause;
- 122 – additional annexes are lettered AA, BB, etc.

123 NOTE 3 The following print types are used:

- 124 – requirements: in roman type;
- 125 – *test specifications: in italic type*;
- 126 – notes: in small roman type.

127 Words in **bold** in the text are defined in Clause 3. When a definition concerns an adjective, the adjective and the
128 associated noun are also in bold.

129 The committee has decided that the contents of this document will remain unchanged until the
130 stability date indicated on the IEC website under “<http://webstore.iec.ch>” in the data related to
131 the specific document. At this date, the document will be

- 132 • reconfirmed,
- 133 • withdrawn,
- 134 • replaced by a revised edition, or
- 135 • amended.

136
