Use of the Information

The Aluminum Association has used its best efforts in compiling the information contained in this publication. Although the Association believes that its compilation procedures are reliable, it does not warrant, either expressly or impliedly, the accuracy or completeness of this information. The Aluminum Association assumes no responsibility or liability for the use of the information herein.

All Aluminum Association published standards, data, specifications and other material are reviewed at least every five years and revised, reaffirmed or withdrawn. Users are advised to contact The Aluminum Association to ascertain whether the information in this publication has been superseded in the interim between publication and proposed use.

FOREWORD

Listed herein are designations and chemical composition limits for unalloyed aluminum registered with The Aluminum Association. The numerical designations are assigned in accordance with the *Recommendation—International Designation System for Unalloyed Aluminum*, which is printed on pages 5 through 6. Additions may be made in accordance with the rules outlined in the *Declaration of Accord* printed on page 7. Some of the registered designations may be the subject of patent or patent applications, and their listing herein is not to be construed in any way as the granting of a license under such patent right.

The following organizations are signatories to the Declaration of Accord on the Recommendation:
