

Technical Information Report

AAMI/ISO TIR22442-4: 2011/(R)2016

Medical devices utilizing
animal tissues and their
derivatives—Part 4:
Principles for elimination
and/or inactivation of
transmissible spongiform
encephalopathy (TSE)
agents and validation
assays for those processes

Medical devices utilizing animal tissues and their derivatives—Part 4: Principles for elimination and/or inactivation of transmissible spongiform encephalopathy (TSE) agents and validation assays for those processes

Approved 10 August 2011 by
Association for the Advancement of Medical Instrumentation

Registered 6 March 2011 and reaffirmed 11 December 2016 by
American National Standards Institute, Inc.

Abstract: Addresses methods of elimination and inactivation of transmissible spongiform encephalopathies (TSE agents) from animal tissues to be used in medical devices. The methods addressed will include those designed for: [1] inactivating infectivity (preferred method to reduce opportunities for cross-contamination); and [2] physically removing TSE agents (without complete inactivation). Includes inactivation and elimination methods to be used in the product manufacturing process and in facilities and equipment designed for utilizing animal tissue products.

Keywords: TSE, elimination, inactivation, tissue, bovine, animal

AAMI Technical Information Report

A technical information report (TIR) is a publication of the Association for the Advancement of Medical Instrumentation (AAMI) Standards Board that addresses a particular aspect of medical technology.

Although the material presented in a TIR may need further evaluation by experts, releasing the information is valuable because the industry and the professions have an immediate need for it.

A TIR differs markedly from a standard or recommended practice, and readers should understand the differences between these documents.

Standards and recommended practices are subject to a formal process of committee approval, public review, and resolution of all comments. This process of consensus is supervised by the AAMI Standards Board and, in the case of American National Standards, by the American National Standards Institute.

A TIR is not subject to the same formal approval process as a standard. However, a TIR is approved for distribution by a technical committee and the AAMI Standards Board.

Another difference is that, although both standards and TIRs are periodically reviewed, a standard must be acted on—reaffirmed, revised, or withdrawn—and the action formally approved usually every five years but at least every 10 years. For a TIR, AAMI consults with a technical committee about five years after the publication date (and periodically thereafter) for guidance on whether the document is still useful—that is, to check that the information is relevant or of historical value. If the information is not useful, the TIR is removed from circulation.

A TIR may be developed because it is more responsive to underlying safety or performance issues than a standard or recommended practice, or because achieving consensus is extremely difficult or unlikely. Unlike a standard, a TIR permits the inclusion of differing viewpoints on technical issues.

CAUTION NOTICE: This AAMI TIR may be revised or withdrawn at any time. Because it addresses a rapidly evolving field or technology, readers are cautioned to ensure that they have also considered information that may be more recent than this document.

All standards, recommended practices, technical information reports, and other types of technical documents developed by AAMI are voluntary, and their application is solely within the discretion and professional judgment of the user of the document. Occasionally, voluntary technical documents are adopted by government regulatory agencies or procurement authorities, in which case the adopting agency is responsible for enforcement of its rules and regulations.

Comments on this technical information report are invited and should be sent to AAMI, Attn: Standards Department, 4301 N. Fairfax Drive, Suite 301, Arlington, VA 22203-1633.

ANSI Technical Report

This AAMI TIR has been registered by the American National Standards Institute as an ANSI Technical Report.

Publication of this ANSI Technical Report has been approved by the accredited standards developer (AAMI). This document is registered as a Technical Report series of publications according to the Procedures for the Registration of Technical Reports with ANSI. This document is not an American National Standard and the material contained herein is not normative in nature.

Comments on the content of this document should be sent to AAMI, Attn: Standards Department, 4301 N. Fairfax Drive, Suite 301, Arlington, VA 22203-1633.

Glossary of equivalent standards

International Standards adopted in the United States may include normative references to other International Standards. For each International Standard that has been adopted by AAMI (and ANSI), the table below gives the corresponding U.S. designation and level of equivalency to the International Standard. NOTE: Documents are sorted by international designation. The code in the US column, “(R)20xx” indicates the year the document was officially reaffirmed by AAMI. E.g., ANSI/AAMI/ISO 10993-4:2002/(R)2009 indicates that 10993-4, originally approved and published in 2002, was reaffirmed without change in 2009.

Other normatively referenced International Standards may be under consideration for U.S. adoption by AAMI; therefore, this list should not be considered exhaustive.

International designation	U.S. designation	Equivalency

Association for the Advancement of Medical Instrumentation

TSE Elimination Working Group

The adoption of ISO/TR 22442-4:2010 as an AAMI technical information report was conducted by the AAMI TSE Elimination Working group under the auspices of the AAMI Tissue Product Safety Committee. Approval of the technical information report does not necessarily mean that all working group members voted for its approval.

At the time this technical information report was published, the **AAMI TSE Elimination Working Group** had the following members:

Cochair: David M. Asher, MD

Members: David M. Asher, MD, FDA/Center for Biologics
Scott Brubaker, American Association of Tissue Banks
Peter A. Burke, PhD, Steris Corporation
Nancy Chobin, RN CSPDM, St Barnabas Healthcare System (Independent Expert)
Jacqueline Daley, Sinai Hospital of Baltimore (Independent Expert)
Thomas J. Frazar, Johnson & Johnson
Steve N. Goldstine, PhD, Steve Goldstine Consultants (Independent Expert)
Joseph V. Hughes, WuXi AppTec Inc.
Tara S. Kupumbati, PhD, Medtronic Inc. WHQ Campus
John Lohr, PhD, Alcon Laboratories Inc.
Teckla A. Maresca, LPN CSPDM, St Clare's Health System (Independent Expert)
Patrick J. McCormick, PhD, Bausch & Lomb Inc.
Russell D. Mills, Zimmer Inc.
Gregg A. Mosley, Biotest Laboratories Inc.
Rodney D. Parker, Stryker Instruments Division
Marimargaret Reichert, RN MA, Mercy Medical Center (Independent Expert)
Klaus Roth, H&W Technology LLC SMP GmbH
Nora E. Wikander, RN,CSPDM, St Josephs Wayne Hospital (Independent Expert)
Jennifer Zwiefelhofer, St Jude Medical Inc.

Alternates: Trabue D. Bryans, WuXi AppTec Inc.
Charles Oren Hancock, RAC, H&W Technology LLC
Aditee Kurane, PhD, St Jude Medical Inc.
Jeff Martin, Alcon Laboratories Inc.
Gerald E. McDonnell, PhD, Steris Corporation
Scott G. McNamee, PhD, FDA/CDRH

NOTE—Participation by federal agency representatives in the development of this document does not constitute endorsement by the federal government or any of its agencies.

At the time this technical information report was published, the **AAMI Tissue Product Safety Committee** had the following members:

Cochair: Richard W. Hutchinson, DVM PhD DABT

Members: Steven B. Binion, PhD MBA, Becton Dickinson & Company
Scott Brubaker, American Association of Tissue Banks
Kimbrell Darnell, CR Bard
Gary S. Fischman, PhD, National Academies (Independent Expert)
Frank Gomez, Abbott Laboratories
Charles Oren Hancock, RAC, H&W Technology LLC
Joseph V. Hughes, WuXi AppTec Inc.
Richard W. Hutchinson, DVM PhD DABT, Johnson & Johnson
Anita Kore, DVM, PhD, 3M Healthcare
