AMERICAN NATIONAL STANDARD/AMERICAN DENTAL ASSOCIATION SPECIFICATION NO. 6 FOR DENTAL MERCURY

The Council on Scientific Affairs of the American Dental Association has approved American Dental Association Specification No. 6 for Dental Mercury. This and other specifications for dental materials, instruments and equipment are being formulated by working groups of the ADA Standards Committee on Dental Products (formerly Accredited Standards Committee MD156 for Dental Materials, Instruments and Equipment). The Committee has representation from all interests in the United States in the standardization of materials, instruments and equipment in dentistry. The Council has adopted the specifications, showing professional recognition of their usefulness in dentistry, and has forwarded them to the American National Standards Institute with a recommendation that the specifications be approved as American National Standards. The American National Standards Institute granted approval of ADA Specification No. 6 as an American National Standard on February 24, 1987. This standard becomes effective February 24, 1988.

The Council thanks the working group members and the organizations with which they were affiliated at the time the specification was developed:

Nelson Rupp (chairman), Paffenbarger Research Center at the NBS, Gaithersburg, MD; Toru Okabe, Baylor College of Dentistry, Dallas, TX; A. Bruce Ady, Jeneric Industries, Wallingford, CT; Arthur Burnett, Dentsply International, York, PA; William Brantley, Marquette University, Milwaukee, WI; Malcolm Jendresen, University of California, San Francisco, CA; Eugene Lautenschlager, Northwestern University, Chicago, IL; David Mahler, University of Oregon, Portland, OR; Miroslav Marek, Georgia Institute of Technology, Atlanta, GA; and D. Timothy Wolf, Goldsmith & Revere, Inc., Englewood, NJ.
