ASABE is a professional and technical organization, of members worldwide, who are dedicated to advancement of engineering applicable to agricultural, food, and biological systems. ASABE Standards are consensus documents developed and adopted by the American Society of Agricultural and Biological Engineers to meet standardization needs within the scope of the Society; principally agricultural field equipment, farmstead equipment, structures, soil and water resource management, turf and landscape equipment, forest engineering, food and process engineering, electric power applications, plant and animal environment, and waste management.

**NOTE:** ASABE Standards, Engineering Practices, and Data are informational and advisory only. Their use by anyone engaged in industry or trade is entirely voluntary. The ASABE assumes no responsibility for results attributable to the application of ASABE Standards, Engineering Practices, and Data. Conformity does not ensure compliance with applicable ordinances, laws and regulations. Prospective users are responsible for protecting themselves against liability for infringement of patents.

ASABE Standards, Engineering Practices, and Data initially approved prior to the society name change in July of 2005 are designated as "ASAE", regardless of the revision approval date. Newly developed Standards, Engineering Practices and Data approved after July of 2005 are designated as "ASABE".

Standards designated as "ANSI" are American National Standards as are all ISO adoptions published by ASABE. Adoption as an American National Standard requires verification by ANSI that the requirements for due process, consensus, and other criteria for approval have been met by ASABE.

Consensus is established when, in the judgment of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution.

**CAUTION NOTICE:** ASABE and ANSI standards may be revised or withdrawn at any time. Additionally, procedures of ASABE require that action be taken periodically to reaffirm, revise, or withdraw each standard.

All requests pertaining to the ANSI/ASABE AD10448:1994 NOV2014 standard should be submitted to ASABE.*

*This standard was reviewed for adoption by the ASABE Agricultural Machinery — Tractors Technical subcommittee, and has been formerly approved by the Power and Machinery Division. Adopted by ASABE November 2014; approved as an American National Standard November 2014.*

**Keywords:** Hydraulic, Implement, Tractor

### **0 Foreword**

**0.1** ANSI/ASABE AD10448:1994 MONYEAR, Agricultural tractors — Hydraulic pressure for implements, is an adoption with deviations of the identically titled ISO standard ISO 10448:1994, Agricultural tractors — Hydraulic pressure for implements. Deviations noted in the following Foreword sections pertain to those provisions where harmonization could not be achieved between ASABE and the International Standard.

**0.2** ANSI/ASABE AD10448:1994 MONYEAR specifies the characteristics of the hydraulic pressure from agricultural tractors to connect hydraulic devices on implements, to permit interchangeable use of various types of implements using remote cylinders and other hydraulic devices.

It applies to agricultural tractors intended for interchangeable implements.

**0.3** Six normative references are listed in ISO 10448:1994. The responsible ASABE committee has reviewed these references and approved the following deviations:

**0.3.1** Replace ISO 730-1: Agricultural wheeled tractors — Rear-mounted three-Point linkage — Part 1: Categories 1, 2, 3 and 4, with ASABE AD730:2009 DEC2012 Agricultural wheeled tractors — Rear-mounted three-point linkage — Categories 1N, 1, 2N, 2, 3N, 3, 4N and 4. Any reference to ISO 730-1 in the printed portion of ISO 10448:1994 shall be replaced by ASABE AD730:2009 DEC2012.

**0.3.2** Replace ISO 5675:1992, Agricultural tractors and machinery — General purpose quick-action hydraulic couplers, with ANSI/ASAE S366.2 MAY2004 (ISO 5675:1992) Agricultural tractors and machinery — General purpose quick-action hydraulic couplers. Any reference to ISO 5675:1992 in the printed portion of ISO 10448:1994 shall be replaced by ANSI/ASAE S366.2 MAY2004 (ISO 5675:1992).

**0.4** This standard has been approved as an American National Standard by ANSI (American National Standards Institute).

**0.5** This standard deviates from ISO 10448:1994 as follows:

**0.5.1** See Section 0.3 for Normative reference deviations.

Text of ISO 10448:1994 Agricultural tractors — Hydraulic pressure for implements, follows.
