**API RECOMMENDED PRACTICE 1627
FIRST EDITION, AUGUST 1986**

**American
Petroleum
Institute**

API recommended practices are published as an aid to standardization of methods and procedures. These recommended practices are not intended to inhibit the use of practices other than those of **API** nor to inhibit the purchase or production of products made to specifications other than those of **API**.

Nothing contained in any **API** recommended practice is to be construed as granting any right, by **implication** or **otherwise**, for the manufacture, sale, or use in connection **with** any method, apparatus, or product covered by letters patent, nor as insuring anyone against liability for infringement of letters patent.

API recommended practices may be used by anyone desiring to do so. Every effort has been **made** by the Institute to assure the accuracy and reliability of the data contained in them; however, the Institute makes no representation, warranty, or guarantee in connection with the publication of **API recommended** practices and **hereby** expressly disclaims any liability or responsibility for loss or damage resulting from their use; for the violation of any federal, state, or municipal regulation with which an **API recommended** practice may conflict; or for the infringement of any patent resulting from the use of an **API recommended** practice.
