

Specification for Internal-Combustion Reciprocating Engines for Oil-Field Service

API SPECIFICATION 7B-11C
NINTH EDITION, NOVEMBER 1, 1994

REAFFIRMED: APRIL 2008

Specification for Internal-Combustion Reciprocating Engines for Oil-Field Service

Exploration and Production Department

API SPECIFICATION 7B-11C
NINTH EDITION, NOVEMBER 1, 1994

REAFFIRMED: APRIL 2008

SPECIAL NOTES

API publications necessarily address problems of a general nature. With respect to particular circumstances, local, state, and federal laws and regulations should be reviewed.

API is not undertaking to meet the duties of employers, manufacturers, or suppliers to warn and properly train and equip their employees, and others exposed, concerning health and safety risks and precautions, nor undertaking their obligations under local, state, or federal laws.

Information concerning safety and health risks and proper precautions with respect to particular materials and conditions should be obtained from the employer, the manufacturer or supplier of that material, or the material safety data sheet.

Nothing contained in any API publication is to be construed as granting any right, by implication or otherwise, for the manufacture, sale, or use of any method, apparatus, or product covered by letters patent. Neither should anything contained in the publication be construed as insuring anyone against liability for infringement of letters patent.

Generally, API standards are reviewed and revised, reaffirmed, or withdrawn at least every five years. Sometimes a one-time extension of up to two years will be added to this review cycle. This publication will no longer be in effect five years after its publication date as an operative API standard or, where an extension has been granted, upon republication. Status of the publication can be ascertained from the API Authoring Department [telephone (214) 953-1101]. A catalog of API publications and materials is published annually and updated quarterly by API, 1220 L Street, N.W., Washington, D.C. 20005.

This document was produced under API standardization procedures that ensure appropriate notification and participation in the developmental process and is designated as an API *standard*. Questions concerning the interpretation of the content of this standard or comments and questions concerning the procedures under which this standard was developed should be directed in writing to the director of the Exploration and Production Department, American Petroleum Institute, 700 North Pearl, Suite 1840, Dallas, Texas 75201. Requests for permission to reproduce or translate all or any part of the material published herein should also be addressed to the director.

API publications may be used by anyone desiring to do so. Every effort has been made by the Institute to assure the accuracy and reliability of the data contained in them; however, the Institute makes no representation, warranty, or guarantee in connection with this publication and hereby expressly disclaims any liability or responsibility for loss or damage resulting from its use or for the violation of any federal, state, or municipal regulation with which this publication may conflict.

API standards are published to facilitate the broad availability of proven, sound engineering and operating practices. These standards are not intended to obviate the need for applying sound engineering judgment regarding when and where these standards should be utilized. The formulation and publication of API standards is not intended in any way to inhibit anyone from using any other practices.

Any manufacturer marking equipment or materials in conformance with the marking requirements of an API standard is solely responsible for complying with all the applicable requirements of that standard. API does not represent, warrant, or guarantee that such products do in fact conform to the applicable API standard.

CONTENTS

	Page
1 SCOPE	1
2 TESTING AND RATING OF INTERNAL-COMBUSTION RECIPROCATING ENGINES.....	1
2.1 Bare Engine	1
2.2 Power Unit	1
2.3 Maximum Standard Brake Horsepower.....	1
2.4 Maximum Standard Torque	1
2.5 Test Engine.....	1
2.6 Adjustments	1
2.7 Test Procedure.....	1
2.8 Cooling-Water, Oil, and Air Temperature Variations	1
2.9 Maximum Brake Horsepower.....	1
2.10 Fuel Consumption.....	1
2.11 Standard Brake Horsepower	2
2.12 Maximum Standard Torque	2
2.13 Test Data	2
2.14 Recommended Service Applications	3
2.15 Report Forms	3
2.16 Marking.....	3
2.17 Out-of-Stock Engines.....	3
2.18 Compliance	3
APPENDIX A—EXHAUST AND AIR-INTAKE OPENING CONNECTIONS	11
APPENDIX B—RECOMMENDED PRACTICE FOR USE OF INTAKE VACUUM VS. LOAD CURVES FOR NATURALLY ASPIRATED INTERNAL-COMBUSTION ENGINES	13
Figures	
1—Test Report Form for Internal-Combustion Bare Engines	4
2—Test Report Form for Internal-Combustion Power Units	6
3—Example of Test Data Curves for Internal-Combustion Bare Engines.....	8
4—Example of Test Data Curves for Internal-Combustion Power Units	9

FOREWORD

This specification is under the jurisdiction of the API Committee on Standardization of Production Equipment.

The use of the API monogram under this standard is not permitted, since the specification defines rating procedures only, and does not provide minimum requirements on quality or standardized dimensions.

The following standard, issued by the API Production Department, is related to this specification:

RP 7C-11F: *Recommended Practice for Installation, Maintenance, and Operation of Internal Combustion Engines.*

Covers recommendations and information of a general nature pertaining to installation; daily, weekly, and monthly maintenance check-off lists; and operating troubles and their causes for all types of internal combustion engines in all types of service.

This standard shall become effective on the date printed on the cover but may be used voluntarily from the date of distribution.
