

Australian Standard[®]

Coal and coke—Analysis and testing

Part 2: Coke—Total moisture

This Australian Standard® was prepared by Committee MN-001, Coal and Coke. It was approved on behalf of the Council of Standards Australia on 7 June 2006. This Standard was published on 11 July 2006.

The following are represented on Committee MN-001:

- Australasian Institute of Mining and Metallurgy
 - Australian Coal Association
 - Australian Coal Preparation Society
 - Australian Institute of Energy
 - Coalfield Geology Council of New South Wales
 - CSIRO, Energy Technology
 - Department of Natural Resources and Mines, Qld
 - Minerals Council of Australia
 - National Association of Testing Authorities, Australia
 - National Generators Forum
 - University of Newcastle
 - University of New South Wales
 - University of Queensland
-

This Standard was issued in draft form for comment as DR 06043.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **www.standards.org.au**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **mail@standards.org.au**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Standards Australia Committee MN-001, Coal and Coke, as a revision of AS 1038.2—1995, *Coal and coke—Analysis and testing, Part 2: Coke—Total moisture*.

The objective of this Standard is to provide those responsible for the analysis of coke with a standardized procedure for determination of total moisture content.

This revision has been editorially updated to comply with current format.

The term ‘informative’ has been used in this Standard to define the application of the Appendix to which it applies. An informative appendix is for information and guidance only.
