

Australian Standard[®]

**METHODS FOR THE ANALYSIS OF
IRON AND STEEL**

**Part 17—DETERMINATION OF
COPPER CONTENT—
SPECTROPHOTOMETRIC
METHOD**

This Australian Standard was prepared by Committee CH/10, Analysis of Metals. It was approved on behalf of the Council of the Standards Association of Australia on 21 January 1988 and published on 5 April 1988.

The following interests are represented on Committee CH/10:

- Aluminium Development Council
- Australasian Institute of Mining and Metallurgy
- Australian Lead Development Association
- Australian Mineral Development Laboratories
- Australian Tin Information Centre
- Australian Zinc Development Association
- Bureau of Steel Manufacturers of Australia
- Confederation of Australian Industry
- Copper Technical Data Centre
- Department of Defence
- Electricity Supply Association of Australia
- Metal Trades Industry Association of Australia
- National Association of Testing Authorities
- Railways of Australia Committee
- Royal Australian Chemical Institute

Additional interests participating in preparation of Standard:

- BHP Steel International, Rod and Bar Division
- BHP Steel International, Slab and Plate Division
- BHP Steel International, Coated Products Division
- Commonwealth Aircraft Corporation
- Department of Defence, Materials Testing Laboratories
- State Rail Authority, N.S.W.
- State Transport Authority, Vic.
- TRW Product Ltd

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.
