

Australian Standard[®]

HEARING AIDS

Part 3—HEARING AID EQUIPMENT NOT ENTIRELY WORN ON THE LISTENER

This Australian standard was prepared by Committee AK/11, Audiology. It was approved on behalf of the Council of the Standards Association of Australia on 25 November 1986 and published on 2 February 1987.

The following interests are represented on Committee AK/11:

Audiological Society of Australia
Better Hearing Australia
Department of Defence
Hearing Aid Council of Australia
National Acoustical Laboratories
Otolaryngological Society of Australia
State Pollution Control Commission of New South Wales
University of Melbourne
University of Queensland

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This standard was issued in draft form for comment as DR 85269.
