

Australian Standard[®]

MATERIAL FOR SOLDERING

Part 2—FLUX-CORED SOLDERS

This Australian standard was prepared by Committee MT/5, Lead and Lead Alloys. It was approved on behalf of the Council of the Standards Association of Australia on 14 January 1986 and published on 5 May 1986.

The following interests are represented on Committee MT/5:

- Australian Atomic Energy Commission
- Confederation of Australian Industry
- Federated Master Plumbers of Australia
- Housing Industry Association of Australia
- Metropolitan Water, Sewerage and Drainage Board, NSW
- Royal Australian Institute of Architects

Representatives of the following interests also participated in the drafting of this standard:

- Australian Lead Development Association
- Australian Tin Information Centre
- Department of Defence
- Telecom Australia

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This standard was issued in draft form for comment as DR 84238.
