

Australian Standard[®]

**METHODS FOR
DETECTING THE SUSCEPTIBILITY OF
AUSTENITIC STAINLESS STEELS TO
INTERGRANULAR
CORROSION**

The following scientific, industrial and governmental organizations and departments were officially represented on the committee entrusted with the preparation of this standard:

Associated Chambers of Manufactures of Australia
Bureau of Steel Manufactures of Australia
Commonwealth Aircraft Corporation
Department of Defence
Federated Chamber of Automotive Industries
Institute of Steel Service Centres of Australia
Metal Trades Industry Association of Australia
Railways of Australia Committee
Society of Automotive Engineers—Australasia
Telecom Australia
University of New South Wales (School of Metallurgy)

This standard, prepared by Committee MT/8, Metallography, was approved on behalf of the Council of the Standards Association of Australia on 13 December 1976, and was published on 1 July 1977.

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This standard was issued in draft form for public review as DR 75088.
