

Australian Standard[®]

**METROLOGY—SYMBOLS FOR
EXPRESSING UNCERTAINTY OF
MEASUREMENTS**

This Australian standard was prepared by Committee ME/27, Engineering Tolerancing Systems, Metrology and Surface Quality. It was approved on behalf of the Council of the Standards Association of Australia on 3 October 1985 and published on 2 December 1985.

The following interests are represented on Committee ME/27:

Bureau of Steel Manufacturers of Australia
CSIRO, Division of Applied Physics
CSIRO, Division of Manufacturing Technology
Confederation of Australian Industry
Department of Defence
Department of Technical and Further Education, N.S.W.
Federal Chamber of Automotive Industries
South Australian Institute of Technology
Institution of Engineers Australia
Institution of Production Engineers
Metal Trades Industry Association of Australia
Railways of Australia Committee
Society of Manufacturing Engineers
University of Queensland

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This standard was issued in draft form for comment as DR 84285.
