Preface

This Standard was prepared by the Standards Australia Committee CE-006, Asphalt and Sprayed Surfacing, to supersede, in part, AS 2891.1.2—2008.

After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this document as an Australian Standard rather than an Australian/New Zealand Standard.

This document sets out two methods for obtaining cores of compacted asphalt from pavements and preparing the cores for testing.
