

AS 3782.3—1990

ISO 7574/3—1985

Australian Standard[®]

**Acoustics—Statistical methods
for determining and verifying
stated noise emission values of
machinery and equipment**

**Part 3: Simple (transition)
method for stated values for
batches of machines**

[ISO title: Acoustics—Statistical methods for determining and
verifying stated noise emission values of machinery and
equipment

Part 3: Simple (transition) method for stated values for batches of
machines]

This Australian Standard was prepared by Committee AV/6, Acoustics, Machinery Noise. It was approved on behalf of the Council of Standards Australia on 26 April 1990 and published on 17 September 1990.

The following interests are represented on Committee AV/6:

Australian and New Zealand Environment Council
Australian Coal Association
Australian Compressed Air and Mining Equipment Institute
Australian Federation of Construction Contractors
Confederation of Australian Industry
Construction Equipment Importers and Manufacturers of Australia
Council of the City of Sydney
Department of Industrial Relations and Employment, N.S.W.
Department of Labour, S.A.
Master Builders Construction and Housing Association, Australia
Metal Trades Industry Association of Australia
Monash University
National Association of Australian State Road Authorities
National Farmers Federation
Outdoor Power Equipment Association
Royal Institute of Naval Architects
Tractor and Machinery Association of Australia
The University of Melbourne

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.
