

Australian Standard[®]

Coal preparation

Part 8: Sample pre-treatment—Drop-shatter

This Australian Standard® was prepared by Committee MN-001, Coal and Coke. It was approved on behalf of the Council of Standards Australia on 2 February 2007. This Standard was published on 23 February 2007.

The following are represented on Committee MN-001:

- Australasian Institute of Mining and Metallurgy
 - Australian Building Codes Board
 - Australian Coal Association
 - Australian Coal Preparation Society
 - Australian Institute of Energy
 - Coalfield Geology Council of NSW
 - CSIRO Energy Technology
 - Department of Mines and Energy (Qld)
 - National Generators Forum
 - Minerals Council of Australia
 - University of Newcastle
 - University of New South Wales
 - University of Queensland
-

This Standard was issued in draft form for comment as DR 06650.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **www.standards.org.au**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **mail@standards.org.au**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Standards Australia Committee MN-001, Coal and Coke, as a new Standard in the AS 4156, *Coal preparation*, series.

The objective of this Standard is to provide operators of coal preparation plants and material handling systems with a method for predicting the size distribution of coals by a drop-shatter treatment.

The term ‘informative’ has been used in this Standard to define the application of the appendix to which it applies. An ‘informative’ appendix is only for information and guidance.
