

AS 4459.11—1997

ISO 10545-11:1994

Reconfirmed 2017

Australian Standard[®]

Methods of sampling and testing ceramic tiles

Part 11: Determination of crazing resistance for glazed tiles

[ISO title: Ceramic tiles, Part 11: Determination of crazing resistance
for glazed tiles]

This Australian Standard was prepared by Committee BD/44, Fixing of Ceramic Tiles. It was approved on behalf of the Council of Standards Australia on 28 February 1997 and published on 5 June 1997.

The following interests are represented on Committee BD/44:

Adhesives and Sealants Manufacturers Association of Australia
The Association of Consulting Engineers Australia
Australian Chamber of Commerce and Industry
Australian Stone and Terrazzo Association
Australian Stone Industry Association
Australian Tile Council
Ceramic Tile Manufacturers Association
Construction, Forestry, Mining and Energy Union
CSIRO, Division of Building, Construction and Engineering
Department of Fair Trading, N.S.W.
Master Builders Australia
New South Wales TAFE Commission
N.S.W. Tile Industry Training Committee

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 96084.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee BD/44, Fixing of Ceramic Tiles. It is identical with and has been reproduced from ISO 10545-11:1994, *Ceramic tiles, Part 11: Determination of crazing resistance for glazed tiles*, and is the result of a consensus among the representatives on the Joint Committee that it be produced as an Australian Standard.

The Standard is one of a series of methods of sampling and testing ceramic tiles that are currently under development.

For the purpose of this Australian Standard, the ISO/IEC text should be modified as follows:

- (a) *Terminology* The words 'Australian Standard' should replace the words 'International Standard' wherever they appear.
- (b) *Decimal marker* A full point should be substituted for a comma where it appears as a decimal marker.
- (c) *References* The references to International Standards should be replaced by references to the following Australian Standards:

<i>Reference to International Standard or other Publication</i>	<i>Australian Standard</i>
ISO	AS
13006 Ceramic tiles— Definitions, classification, characteristics and marking	—

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
