

Australian Standard™

Closed circuit television (CCTV)

Part 3: PAL signal timings and levels

This Australian Standard was prepared by Committee EL-051, Non-Broadcast Television. It was approved on behalf of the Council of Standards Australia on 22 May 2006.
This Standard was published on 21 June 2006.

The following are represented on Committee EL-051:

Australian Communications and Media Authority
Australian Federal Police
Australasian Railway Association
Engineers Australia
Australian Security Industry Association
National Security Association of Australia
Society of Motion Picture and Television Engineers

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia, GPO Box 476, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 05407.

PREFACE

This Standard was prepared by the Standards Australia Committee EL-031, Intruder Alarm Equipment and Installations. This is a new Joint Australian/New Zealand Standard.

The objective of this Standard is to provide requirements for phase alternating line (PAL) closed circuit television (CCTV) signal timings and levels.

The CCTV PAL signal timings and levels given in this Standard are based on the Australian Communications and Media Authority Technical Planning Guidelines.
