

Australian Standard[®]

Plumbing and drainage products

Part 458: Universal plastic-bodied transition couplings

This Australian Standard® was prepared by Committee WS-001, Water Fittings. It was approved on behalf of the Council of Standards Australia on 30 September 2008. This Standard was published on 23 December 2008.

The following are represented on Committee WS-001:

- AUSTAP
 - Australian Industry Group
 - Australian Stainless Steel Development Association
 - Building Officials Institute of New Zealand
 - Certification Interests (Australia)
 - Copper Development Centre—Australia
 - Master Plumbers Association of NSW
 - Master Plumbers, Gasfitters and Drainlayers New Zealand
 - New Zealand Association of Plumbing Distributors
 - Plastics Industry Pipe Association of Australia
 - Plastics New Zealand
 - Queensland Brassware Industry Advisory Panel
 - South Australian Water Corporation
 - Testing Interests (Australia)
 - Water Corporation Western Australia
-

This Standard was issued in draft form for comment as DR 07437.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **www.standards.org.au**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **mail@standards.org.au**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee WS-001, *Water Fittings*, to supersede AS 5200.458—2004, *Technical Specification for plumbing and drainage products Part 458: Universal transition fittings*.

The objective of this Standard is to provide general requirements for couplings to be used for connecting pipes of diverse materials. The basic principle is that the piping systems attached by the universal plastic-bodied transition couplings are stronger than the equivalent PE pipe system strength.

The test protocol and information in this Standard was arranged by committee members to meet the authorization requirements given in the Plumbing Code of Australia.

The word 'VOID' set against a clause indicates that the clause is not used in this Standard. The inclusion of this word allows for the use of a common clause numbering system for the plumbing and drainage Standards.
