

Electricity metering equipment (a.c.)— Particular requirements

Part 61: Power consumption and voltage requirements (IEC 62053- 61:1998, MOD)

AS 62053.61:2018

This Australian Standard® was prepared by EL-011, Electricity Metering Equipment. It was approved on behalf of the Council of Standards Australia on 4 November 2018.

This Standard was published on 13 December 2018.

The following are represented on Committee EL-011:

- Australian Chamber of Commerce and Industry
- Australian Energy Council
- Australian Energy Market Operator
- Australian Industry Group
- Consumers' Federation of Australia
- Electrical Regulatory Authorities Council
- Energy Networks Australia
- National Electrical and Communications Association
- National Measurement Institute (Australian Government)

This Standard was issued in draft form for comment as DR AS IEC 62053.61:2018.

Preface

This Standard was prepared by the Standards Australia Committee EL-011, Electricity Metering Equipment.

The objective of this Standard applies only to newly manufactured “combined meters”, measuring more than one type of electric energy (e.g. active and reactive) and meters integrating additional functions which are not in the scope of the AS 62052.11, AS 62053.21, AS 62053.22 and AS 62063.23 standards; these additional functions, all related to electric energy metering are, for instance, maximum demand indicator, time switches, ripple control or radio receivers, etc.

This Standard is an adoption with national modifications, and has been reproduced from, IEC 62053-61:1998 (ED 1.0), *Electricity metering equipment (a.c.) — Particular requirements — Part 61: Power consumption and voltage requirements*.

[Appendix ZZ](#) lists the variations for the application of this Standard in Australia.

As this document has been reproduced from an International Standard, the following applies:

- (a) In the source text “this part of IEC 62053” and “this International Standard” should read “this Australian Standard”.
- (b) A full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.
