Keeping Standards up-to-date

Australian Standards are living documents that reflect progress in science, technology and systems. To maintain their currency all standards are periodically reviewed and new editions are published. Between editions amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting www.standards.org.au

Standards Australia welcomes suggestions for improvements and encourages readers to notify them immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au or write to Standards Australia GPO Box 476, Sydney, NSW 2001.
