Earth-moving machinery — Product identification numbering system

AS ISO 10261:2023

This Australian Standard ® was prepared by ME-063, Earthmoving Equipment. It was approved on behalf of the Council of Standards Australia on 25 October 2023.

This Standard was published on 10 November 2023.

The following are represented on Committee ME-063:

- Australasian Institute of Mining & Metallurgy
- Australian Industry Group
- Better Regulation Division (Fair Trading, SafeWork NSW, TestSafe)
- Construction and Mining Equipment Industry Group
- Department of Regional NSW
- Engineers Australia
- Forestry Corporation of NSW
- Institute of Instrumentation, Control & Automation Australia
- Minerals Council of Australia
- Mining Electrical and Mining Mechanical Engineering Society
- Resources Safety & Health Queensland
- The University of Queensland
- Victorian WorkCover Authority (WorkSafe Victoria)

This Standard was issued in draft form for comment as DR AS ISO 10261:2023.

Preface

This Standard was prepared by the Standards Australia Committee ME-063, Earthmoving Equipment, to supersede AS ISO 10261:2021.

The objective of this document is to specify the requirements, content, structure and identification location of a product identification numbering system for earth-moving machinery as defined in AS ISO 6165:2023.

NOTE AS ISO 10261 PIN can be used on other types of off-road work machines.

It is not applicable to the identification of components or attachments.

This document is identical with and has been reproduced from, ISO 10261:2021, *Earth-moving machinery — Product identification numbering system*.

As this document has been reproduced from an International document, a full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.

Contents

Preface	ii
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 General requirements	2
4.1 Characters in the PIN	2
4.2 Protection against adding characters	2
4.3 Allowed characters	2
4.4 World manufacturer code (WMC)	3
4.5 Machine descriptor section (MDS)	3
4.6 Machine indicator section (MIS)	3
4.7 Check letter (CL)	3
4.8 Duplication	3
4.9 PIN format	4
5 Product label/plate	4
5.1 Components	4
5.2 Location	5
5.3 Fixation	5
6 Marking	5
6.1 Primary marking	5
6.2 Optional marking	5
6.2.1 Product label/plate	5
6.2.2 Concealed marking	5
7 PIN character readability	5
8 Instruction manual reference	6
Annex A (normative) WMC listing procedure	7
Bibliography	8
