Australia

Earth-moving machinery — Loaders and backhoe loaders

Part 2: Test method for measuring breakout forces and lift capacity to maximum lift height

AS ISO 14397.2:2021

This Australian Standard® was prepared by ME-063, Earthmoving Equipment. It was approved on behalf of the Council of Standards Australia on 25 March 2021.

This Standard was published on 9 April 2021.

The following are represented on Committee ME-063:

- Australian Industry Group
- Better Regulation Division — SafeWork NSW
- Construction and Mining Equipment Industry Group
- Department of Natural Resources, Mines and Energy, Qld
- Department of Regional NSW
- Engineers Australia
- Institute of Instrumentation, Control & Automation Australia
- Minerals Council of Australia
- Mining Electrical and Mining Mechanical Engineering Society
- University of Queensland

This Standard was issued in draft form for comment as DR AS ISO 14397.2:2020.

Preface

This Standard was prepared by the Standards Australia Committee ME-063, Earthmoving Equipment.

The objective of this document is to specify a test method for measuring the breakout forces and lift capacity to maximum lift height of wheeled or crawler loaders, or of the loader portion of backhoe loaders, as these machine types are defined in ISO 6165.

This document is identical with, and has been reproduced from, ISO 14397-2:2007, *Earth-moving machinery — Loaders and backhoe loaders — Part 2: Test method for measuring breakout forces and lift capacity to maximum lift height*.

As this document has been reproduced from an International Standard, the following applies:

- (a) In the source text “this part of ISO 14397” should read “this document”.
- (b) A full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.

Contents

Preface	ii
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Apparatus	2
5 Test conditions	2
5.1 Test site	2
5.2 Preparation	2
5.2.1 General	2
5.2.2 Specific conditions	2
5.2.3 Bucket	3
5.2.4 Test equipment	3
6 Test method	3
6.1 General	3
6.2 Test procedure	3
6.3 Breakout force	3
6.4 Lift capacity to maximum height, m_{lift}	4
7 Test report	6
7.1 General	6
7.2 Crawler machines	7
7.3 Wheeled machines	7
7.4 Bucket fitted for each test	7
7.5 Results	7
