Earth-moving machinery — Field of vision of surveillance and rear-view mirrors

Part 1: Test methods

AS ISO 14401.1:2021

This Australian Standard® was prepared by ME-063, Earthmoving Equipment. It was approved on behalf of the Council of Standards Australia on 11 December 2020.

This Standard was published on 22 January 2021.

The following are represented on Committee ME-063:

Australian Industry Group
Better Regulation Division — SafeWork NSW
Construction and Mining Equipment Industry Group
Department of Natural Resources, Mines and Energy, Qld
Department of Regional NSW
Engineers Australia / Mining Electrical and Mining Mechanical Engineering Society
Institute of Instrumentation, Control & Automation Australia
Minerals Council of Australia
University of Queensland

This Standard was issued in draft form for comment as DR AS ISO 14401.1:2020.

Preface

This Standard was prepared by the Standards Australia Committee ME-063, Earthmoving Equipment.

The objective of this document is to specify a static test method for determining the field of vision provided by surveillance and rear-view mirrors fitted to earth-moving machinery as defined in ISO 6165.

This document is identical with, and has been reproduced from, ISO 14401-1:2009, *Earth-moving machinery — Field of vision of surveillance and rear-view mirrors — Part 1: Test methods*.

As this document has been reproduced from an International Standard, the following applies:

- (a) In the source text “this part of ISO 14401” should read “this document”.
- (b) A full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.

Contents

Preface	ii
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Test apparatus	2
5 Machine test configuration	4
6 Performance criteria for mirrors	4
7 Measurement and evaluation procedure	4
7.1 Test surface marking and machine location on test surface	4
7.2 Positioning of the test apparatus	5
7.3 Measurement of field of vision	5
8 Calculation and computer simulation procedure	5
9 Test report	5
9.1 Machine details	5
9.2 Drawing	6
