Rare earth — Vocabulary

Part 2: Metals and their alloys

AS ISO 22444.2:2023

This Australian Standard ® was prepared by MN-011, Rare Earth. It was approved on behalf of the Council of Standards Australia on 10 October 2023.

This Standard was published on 27 October 2023.

The following are represented on Committee MN-011:

Association of Mining and Exploration Companies
Australasian Institute of Mining & Metallurgy
Australian Nuclear Science and Technology Organisation
Chamber of Minerals and Energy of Western Australia
CSIRO
Curtin University
Department of Industry, Science and Resources
Department of Resources (QLD) — Geological Survey of Queensland
Minerals Council of Australia

This Standard was issued in draft form for comment as DR AS ISO 22444.2:2023.

Preface

This Standard was prepared by the Standards Australia Committee MN-011, Rare Earth.

The objective of this document is to define the terms for rare earth minerals, oxides and other compounds, as well as for related production processes.

This document can be used as a reference to unify technical terms in rare earth production, application, inspection, circulation, trading, scientific research, and education.

This document is identical with, and has been reproduced from, ISO 22444-2:2020, *Rare earth — Vocabulary — Part 2: Metals and their alloys*.

As this document has been reproduced from an International document, a full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.

Contents

Preface	ii
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Terms related to rare earth metals	3
5 Terms related to rare earth alloys	3
6 Terms related to the preparation and purification process of rare earth metals and their alloys	6
Annex A (informative) Basic properties of individual rare earth metals	9
Bibliography	10

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 298, *Rare earth*.

A list of all parts in the ISO 22444 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
