Preface

This Standard was prepared by the Standards Australia Committee ME-026, Industrial Trucks.

The objective of this document is to specify methods for inspection and repair of solid-section fork arms in use on all types of fork-lift trucks.

This document is identical with, and has been reproduced from, ISO 5057:2022, *Industrial trucks — Inspection and repair of fork arms in service on fork-lift trucks*.

As this document has been reproduced from an international document, a full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.

Contents

Preface	ii
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Inspection intervals	1
5 Inspection	1
5.1 General	1
5.2 Surface cracks	2
5.3 Difference in height of fork tips	2
5.4 Straightness	2
5.5 Positioning lock	2
5.6 Legibility of marking	2
5.7 Wear	2
5.7.1 Fork arm blade and shank	2
5.7.2 Fork arm mountings	2
5.7.3 Fork arm tip damage	3
6 Repair and testing	3
6.1 Repair	3
6.2 Yield test	3
Annex A (informative) Maximum inspection intervals dependent on use	4
Bibliography	5
