Preface

This Standard was prepared by the Standards Australia Committee MS-065, Photography.

The objective of this document is to give terms and definitions of pre-packaged chemicals used in the processing of silver halide based photographic materials.

This document is identical with, and has been reproduced from, ISO 5989:1995, *Photography — Pre-packaged chemicals for the processing of silver halide based photographic materials — Vocabulary*.

As this document has been reproduced from an International document, the following apply:

- (a) In the source text “this International Standard” should read “this document”.
- (b) A full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.
