STANDARDS  
Australia

# Earth-moving machinery — Lubrication fittings

## Part 2: Grease-gun nozzles

AS ISO 6392.2:2021

This Australian Standard ® was prepared by ME-063, Earthmoving Equipment. It was approved on behalf of the Council of Standards Australia on 24 June 2021.

This Standard was published on 9 July 2021.

The following are represented on Committee ME-063:

Australian Industry Group  
Better Regulation Division — SafeWork NSW  
Construction and Mining Equipment Industry Group  
Department of Regional NSW  
Department of Resources, Qld  
Engineers Australia  
Institute of Instrumentation, Control & Automation Australia  
Minerals Council of Australia  
Mining Electrical and Mining Mechanical Engineering Society  
University of Queensland

This Standard was issued in draft form for comment as DR AS ISO 6392.2:2021.

## Preface

This Standard was prepared by the Standards Australia Committee ME-063, Earthmoving Equipment.

The objective of this document is to specify grease-gun nozzles to be used for the injection of grease into the lubrication points of earth-moving machinery by means of the grease fitting specified in AS ISO 6392.1:2021. The grease-gun nozzles covered by this document are used on the types of earth-moving machinery defined in ISO 6165..

This document is identical with, and has been reproduced from, ISO 6392-2:1996, *Earth-moving machinery — Lubrication fittings — Part 2: Grease-gun nozzles*.

As this document has been reproduced from an International Standard, the following applies:

- (a) In the source text “this part of ISO 6392” should read “this document”.
- (b) A full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.
