Preface

This Standard was prepared by the Standards Australia Committee IT-034 Automatic Identification and Data Capture Techniques, to supersede AS ISO/IEC 15459.2:2006, *Information technology — Unique identifiers, Part 2: Registration procedures*.

The objective of this document is to specify the procedural requirements to maintain identities and outlines the obligations of the Registration Authority.

This part of AS ISO/IEC 15459 excludes those entities where ISO has designated Maintenance Agencies or Registration Authorities to provide identity and/or identifier schemes. It does not apply to:

- (a) freight containers, because their unique coding is specified in ISO 6346, Freight containers — Coding, identification and marking;
- (b) vehicles, because their unique identification is specified in ISO 3779, Road vehicles — Vehicle identification number (VIN) — Content and structure; and
- (c) car radios, because their unique identification is specified in ISO 10486, Passenger cars — Car radio identification number (CRIN).

The exclusion also applies to:

- (i) AS 1519, *Information and documentation — International standard book number (ISBN)*; and
- (ii) AS/NZS ISO 3297, *Information and documentation — International standard serial number (ISSN)*.

This document is identical with, and has been reproduced from, ISO/IEC 15459-2:2015, *Information technology — Automatic identification and data capture techniques — Unique identification — Part 2: Registration procedures*.

As this document has been reproduced from an international document, a full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.
