Preface

This Standard was prepared by the Standards Australia Committee IT-032, Biometrics and Identification, to supersede AS ISO/IEC 19785.2-2007, *Information technology — Common Biometric Exchange Formats Framework, Part 2: Procedure for the operation of the Biometric Registration authority*.

The objective of this document is to describe the identification scheme used by the Biometric Registration authority (BRA) in preparing, maintaining and publishing registers of identifiers for biometric organizations and biometric objects, and provides a description of BRA responsibilities and services. Procedural requirements and recommendations are not within the scope of this document and are maintained separately on the ISO/IEC JTC 1/SC 37 website.

This document is identical with, and has been reproduced from, ISO/IEC 19785-2:2021, *Information technology — Common Biometric Exchange Formats Framework — Part 2: Biometric registration authority*.

As this document has been reproduced from an International document, a full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.
