Preface

This Standard was prepared by the Standards Australia Committee IT-042, Internet of Things and Related Technologies.

The objective of this document is to provide a definition of Internet of Things along with a set of terms and definitions. This document is a terminology foundation for the Internet of Things.

This document is identical with, and has been reproduced from, ISO/IEC 20924:2018, *Internet of things (IoT) — Vocabulary*.

As this document has been reproduced from an International Standard, a full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.

Contents

Preface	ii
FOREWORD	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
