

Australian/New Zealand Standard

Guidelines for technical information for building and construction products

AS/NZS 1388:1994

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee BD/52, Trade and Technical Literature for the Building Industry. It was approved on behalf of the Council of Standards Australia on 15 September 1994 and on behalf of the Council of Standards New Zealand on 19 September 1994. It was published on 5 December 1994.

The following interests are represented on Committee BD/52:

Australian Department of Administrative Services
Australian Institute of Building
Australian Institute of Construction Specifiers
Building Research Association of New Zealand
CSIRO—Division of Building, Construction & Engineering, Australia
Royal Australian Institute of Architects

Review of Standards. To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 91229.

Australian/New Zealand Standard

Guidelines for technical information for building and construction products

First published in Australia as AS 1388— 1974.
Jointly revised and designated as Joint Standard

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee BD/52 on Trade and Technical Literature for the Building Industry to supersede AS 1388—1974, *Recommendations for trade and technical literature for the building industry*.

The objective of this Standard is to provide producers of literature for the building and construction industries with guidelines for presenting technical information so that the information can be in a clear and structured form.

The term ‘informative’ has been used in this Standard to define the application of the appendix to which it applies. An ‘informative’ appendix is only for information and guidance.

© Copyright — STANDARDS AUSTRALIA/STANDARDS NEW ZEALAND

Users of Standards are reminded that copyright subsists in all Standards Australia and Standards New Zealand publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia or Standards New Zealand may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia or Standards New Zealand. Permission may be conditional on an appropriate royalty payment. Australian requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia. New Zealand requests should be directed to Standards New Zealand.

Up to 10 percent of the technical content pages of a Standard may be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia or Standards New Zealand.

Inclusion of copyright material in computer software programs is also permitted without royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia or Standards New Zealand at any time.
