Methods of test for textiles

Method 4.5: Colourfastness tests—Determination of colourfastness to chlorinated swimming pool water

RECONFIRMATION NOTICE

Technical Committee TX-020 has reviewed the content of this publication and in accordance with Standards Australia procedures for reconfirmation, it has been determined that the publication is still valid and does not require change.

Certain documents referenced in the publication may have been amended since the original date of publication. Users are advised to ensure that they are using the latest versions of such documents as appropriate, unless advised otherwise in this Reconfirmation Notice.

Approved for reconfirmation in accordance with Standards Australia procedures for reconfirmation on 6 July 2016.

Approved for reconfirmation in New Zealand on behalf of the Standards Council of New Zealand on 4 November 2016.

The following are represented on Technical Committee TX-020:

Ag Research
Australian Wool Processors Council
AWTA Textile Testing
Council of Textile and Fashion Industries of Australia
Drycleaning Institute of Australia
National Association of Testing Authorities Australia
RMIT University
The Textile Institute

NOTES

Australian/New Zealand Standard™

Method of test for textiles

Method 4.5: Colourfastness tests— Determination of colourfastness to chlorinated swimming pool water

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee TX/20, Testing of Textiles to supersede the AS 2001.4.5—1983.

The object of this Standard is to provide manufacturers and others with a suitable test method for determining the colourfastness of textiles to chlorinated swimming pool water.

This Standard is identical with and has been reproduced from ISO 105-E03:1994, *Textiles—Tests for colour fastness*, Part E03: *Colour fastness to chlorinated water (swimming-pool water)*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number appears on the cover and title page while the International Standard number appears only on the cover.
- (b) In the source text, ‘this part of ISO 105’ should read ‘this Australian/New Zealand Standard’.
- (c) In Clause 4.9, the expression ‘see ISO 105-A01:1994, subclause 8.1’ should read ‘see AS/NZS 2001.4.1’.
- (d) A full point substitutes for a comma when referring to a decimal marker.

Reference to International Standards should be replaced by Australian, New Zealand or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>		<i>Australian, New Zealand or Australian/New Zealand Standard</i>	
ISO		AS/NZS	
105	Textiles—Tests for colour fastness	2001	Methods of test for textiles
105-A01	Part A01: General principles of testing	2001.4.1	Method 4.1: Colourfastness tests—Definitions and general requirements
105-A02	Part A02: Grey scale for assessing change in colour	2001.4.1	Method 4.1: Colourfastness tests—Definitions and general requirements
