AS/NZS 3749.2:1997

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL/31, Intruder Alarm Equipment and Installation. It was approved on behalf of the Council of Standards Australia on 27 June 1997 and on behalf of the Council of Standards New Zealand on 2 June 1997. It was published on 5 August 1997.

The following interests are represented on Committee EL/31:

Australian Chamber of Commerce and Industry
 Australian Electrical and Electronic Manufacturers Association
 Australian Security Industry Association
 Department of Defence
 Insurance Council of Australia
 Metal Trades Industry Association of Australia
 New Zealand Security Industry Association
 N.S.W. Police Service
 Security Agents Institute of W.A.
 Tasmania Police
 Victoria Police
 Victoria Security Institute
 Works Australia

Additional interests participating in preparation of Standard:

Australian Automobile Association
 Australian Automotive Aftermarket Association
 Australian Car Alarm Traders Association
 Department of Administrative Services
 Federal Chamber of Automotive Industries
 Manufacturing and retailing interests
 Royal Automobile Club

Review of Standards. To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL/31 on Intruder Alarm Systems and Installations. It supersedes AS 3749.2—1990.

It is Part 2 of a two-part Standard, the parts of which are as follows:

- (a) Part 1: Performance requirements.
- (b) Part 2: Installation and maintenance.

This Standard details the installation and maintenance procedures for vehicle alarm systems designed in accordance with Part 1, with the intent that such systems will be properly installed and maintained.

Since the publication of the first edition of this Standard, more stringent anti-noise legislation aimed specifically at car alarms, and in particular false alarms, has been introduced in some States. Because it is recognized that the vast majority of vehicular false alarms are a direct result of poor installation and maintenance of alarm systems, this Standard differs significantly from the previous edition in that it provides more detail on the installation procedures and maintenance requirements, and includes methods for testing to verify that the alarm has been correctly installed. It is hoped that adherence to this Standard, together with the improved performance criteria in Part 1, will significantly reduce the number of false alarm incidents.

The term 'informative' has been used in this Standard to define the application of the appendix to which it applies. An 'informative' appendix is only for information and guidance.

© Copyright — STANDARDS AUSTRALIA/STANDARDS NEW ZEALAND

Users of Standards are reminded that copyright subsists in all Standards Australia and Standards New Zealand publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia or Standards New Zealand may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia or Standards New Zealand. Permission may be conditional on an appropriate royalty payment. Australian requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia. New Zealand requests should be directed to Standards New Zealand.

Up to 10 percent of the technical content pages of a Standard may be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia or Standards New Zealand.

Inclusion of copyright material in computer software programs is also permitted without royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia or Standards New Zealand at any time.
